Maintenance and review of dental implants, including the management of implant complications.

6.30pm Registration and refreshments.
7pm - 9pm Presentations and discussions.

Training and meal with compliments of Highland View and bredent UK.

Aims/objectives
This study club is aimed at dentists. It is intended for any practitioner with an interest in dental implant treatment. It is suitable for dentists who are either new to dental implant treatment or those already placing and/or restoring dental implants. The study clubs will aim to cover some of the more "contentious" areas of implantology.

The latest evidence will be reviewed and presented with our own personal experiences in these techniques. Attendees will be welcome to bring along study models / radiographs / photographs etc., of potential cases to discuss treatment plans.

Meet the lecturers
Dr Philip Hayter and Dr Sanjay Chopra are both experienced oral surgeons with a special interest in implant dentistry. They were awarded the Diploma in Implant Dentistry by the Royal College of Surgeons Faculty of General Dental Practitioners in 2004 and also hold the Advanced Certificate in Implant Dentistry.

Philip and Sanjay are both SAAD trained sedationists and members of the Dental Teachers Sedation group. They have had a special interest in sedation, dental implants and oral surgery for over 20 years and help train many clinicians in these techniques.

Both qualified from the University of London in 1990 and are now tutors and lecturers at the Royal College of Surgeons and examiners at the Royal College of Surgeons Edinburgh.

Sanjay and Philip established Highland View Dental Surgery in 1995, a group of specialist referral centres across Essex offering dental implants, oral surgery and sedation as well as other specialities.

Registration
To register for the study club, please contact Dominic Ventimiglia on 07703 196 159 or email dominic.ventimiglia@bredent.co.uk
